DETAILED ACTION

1. The objection to claims 1 and 8 and the rejection of claims 6, 16 and 17 under 35 USC § 112, second paragraph set forth in the previous Office Action (mailed on 21 October 2005) have been overcome and are withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 2, 4-12 and 14-20 are rejected under 35
 U.S.C. 102(e) as being anticipated by Yoneda et al (U.S. Patent Application Publication 2003/0022575 Al) for the reasons of record and with further comment below.

The aspects (in independent claims 1 and 9) of the polyolefin polymer (i.e., a density of less than 1.0 g/cm³ and a flexural modulus of more than 9000 kg/cm²) are inherent in Yoneda et al principally because Yoneda et al teach a polyolefin polymer as an island polymer and the polyolefin polymer of

Art Unit: 1732

Yoneda et al generally has these claimed aspects, as shown by the Modern Plastics Encyclopedia reference (pages 73 and 74; item 13 in the tables on pages 482-484).

Response to Arguments

- 4. Applicant's arguments filed on 20 January 2006 have been fully considered but they are not persuasive.
- 5. Applicant argues (pages 11 and 12) that Yoneda et al do not disclose a polyolefin polymer having a density and flexural modulus as claimed. Examiner responds that Yoneda et al teach a polyolefin polymer as claimed, and that the claimed density and flexural modulus are inherent in Yoneda et al principally because polyolefin polymers generally have such a density and flexural modulus as shown by the Modern Plastics Encyclopedia reference.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will

Art Unit: 1732

expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
